## PROFILE

IT Consultant with 8+ years of experience in ERP systems, business analysis, and project management. Currently building technical development skills through an intensive Java program at INTEC Brussels to take on broader and more technical roles in IT projects. I have a natural eye for detail and a drive for continuous improvement, with strong skills in connecting business requirements, technical solutions, and user needs. I am focused on efficiency, quality, and creating the best user experiences. **I am excited to learn from experienced developers as I grow in this new direction and contribute my analytical mindset to the team.**

## EXPERIENCE

### Functional Consultant

**SiNube** - Oracle ERP & EPM Cloud  
Jul 2023 - Jun 2024

**Contributed to global enterprise implementations** of Oracle Financials Cloud, with a focus on modules such as General Ledger and Accounts Payable. Performed regression testing on existing processes and supported the alignment of functional requirements. Collaborated closely with business teams to ensure smooth configuration and delivery.

### Account Manager

**Adyen** - Payment Service Provider  
Apr 2021 - Mrt 2023

Managed **strategic client relationships** and conducted business reviews at C-level. Identified opportunities to improve margins and guided the implementation of financial products. Collaborated closely with departments at all levels to drive growth and deliver **seamless customer journeys**. Champion in Data and CRM (Looker, Salesforce).

### ERP Consultant

**AFAS** - Administrative Software  
Sep 2015 - Apr 2021

Started in support and testing, and advanced to a **consultant role** with a focus on finance, logistics, subscriptions and project management. Provided daily guidance to clients in optimizing and **integrating ERP processes**. Also **improved internal workflows** and contributed to documenting technical functionalities. Collaboration with cross-functional teams was key to successful implementations.
