## Profile

IT Consultant with 8+ years of experience in ERP systems, business analysis, and project management. Currently building technical development skills through an intensive Java program at INTEC Brussels, with a hands-on internship as Software Test Engineer at FOD Financiën. Natural eye for detail, drive for continuous improvement, and strong communication skills. Focused on efficiency, quality, and bridging the gap between business requirements and technical solutions.

## Skills

<b>Testing &amp; QA</b>	BDD, Cucumber, Gherkin, JUnit, Postman, Swagger, Regression Testing, Integration Testing, Manual Testing, Test Cases
<b>Backend</b>	Java, Spring Boot, Spring MVC, REST APIs, SQL, Hibernate / JPA, JDBC, OpenAPI
<b>Frontend</b>	HTML, CSS, JavaScript, Angular, Bootstrap
<b>Tools &amp; Workflow</b>	Git, Maven, Docker, Jira, Agile / Scrum
<b>Analysis</b>	UML, BPMN, Requirements Analysis, Business Analysis, ERP Implementations, CRM, Stakeholder Management, Process Optimization
<b>Languages</b>	Dutch (Native), English (C2), French (B1)

## Experience

### Software Test Engineer (Internship)

FOD Financiën — Brussels · November 2025 – April 2026

Working in the Automation team, focusing on application testing and BDD testing with Cucumber and Gherkin for the VAT Calculator application. Writing and maintaining test scenarios, validating API contracts via Swagger, and participating in Scrum ceremonies including daily stand-ups, sprint planning, and refinement sessions.

### Java Enterprise Developer (Education)

INTEC Brussel · 2025 – 2026

Full-time intensive program covering Java, Spring Boot, Hibernate, JPA, Angular, Docker, SQL, and testing frameworks. Building the technical foundation for a developer career while combining it with a hands-on internship.

### Functional Analyst

SiNube — Brussels · 2023 – 2024

Focused on Oracle Financials Cloud, supporting configuration follow-up, regular regression testing, and process validation. Completed Oracle certifications including Financials and Procurement foundations. The complexity of Oracle Financials sparked a move towards software development.

### Account Manager

Adyen — Brussels · 2021 – 2023

Managed strategic enterprise merchant portfolios and led C-level business reviews. Identified opportunities to improve margins and optimize payment flows. Championed data insights and CRM for the team. Worked cross-functionally with technical, operational, and commercial teams.

### ERP Consultant

AFAS Software — Leusden, NL · 2015 – 2021

Started in support and testing, organically grew into a consultant role over five years. Worked across finance, logistics, subscriptions, and change management modules. Took initiative in improving internal workflows and documenting technical functionalities.

### Mission Critical Consultant

Hewlett Packard — Brussels · 2012 – 2015

Provided out-of-hours critical support for enterprise and government HP infrastructure across the BeNeLux. Ensured stability, high availability, and performance of essential systems where downtime was not an option.

## Certifications

---

- 2025** · Programming with Java — Amazon · Coursera
- 2025** · Introduction to Software Development — Amazon · Coursera
